

Steel Rail Boards Model R

Fully welded steel rail boards provide a safe ramp for powered vehicle application.

- All-welded steel construction
- Capacities from 15,000 to 90,000 pounds
- Rectangular or flared design
- Box understructure for strength and safety
- Heavy-duty locking rings for safe, secure positioning
- Lifting loops drop into recessed pockets
- Lifting chains available
- Designed for use on all types of railway boxcars
- Designed and built to match the specific dock conditions
- Rail Board worksheet required. This information allows Bluff to manufacture a rail board that has the proper width, length, bends, capacity, and understructure for your application and safety.
