

## BOLT-ON AND BULLNOSE POST PROTECTORS

Bluff's Bolt-on post protectors are designed with increased aisle space in mind. When reach trucks or other warehouse vehicles are used for storage and handling, warehouse racks are in danger of damage from the vehicles that get too close to the rack columns. The sleek designs of our Bolt-on and Bullnose Post Protectors are extremely space efficient, allowing for smooth navigation around racks.

### BENEFITS AND FEATURES

#### BOLT-ON POST PROTECTOR Model CP

- 42" standard height with any height available
- Easily installed - no anchoring necessary
- Bolts directly to the column
- Protects pallet rack uprights against damage from forklifts and pallet trucks
