

SLAB HANDLING FORKLIFT EXTENSIONS

Safely and Quickly Move Slab Products

Bluff Manufacturing's Slab Handling Fork Extensions extend the reach of your existing forklift tines to move and handle heavy slab products like Marble and Granite. Our Fork Extensions make moving these products safer and protect the slabs in transit.

Bluff Slab Handling Fork Extensions fit standard Forklift Tines and can be customized to fit unique styles. They are removable from the forklift and use chains to secure the slabs. They are made of heavy duty steel that has been welded and customized to your specific forklift. Bluff Slab Handling Fork Extensions are manufactured to match existing forklift capacity.
