

# Forklift Stabilization Kit

*A Safety Kit, which provides support and stability during maintenance work of forklift*

## Product Overview

**BLUFF**  
AN INTEGRATED WAREHOUSE SOLUTIONS BRAND

COMPOSITE LUMBER

Manufactured and tested in compliance  
ANSI Standard MH30.2

Innovative Products  
Safety Standards

## Features

- Kit contains two true 4"x4"x 22" and 4"x4"x48" composite components formasthead repair
- Combines both dura crib and dura stat components
- A carrying bag is provided for smaller parts for convenient transportation
- Bessey clamps are provided for use with the mast supports to provide additional security
- Multi-use blocks are provided with all three kits for blocking and raising forklifts for safer maintenance
- Components are produced from a proprietary, 100% recycled plastic blend for added durability
- This Construction process creates a far safer, stronger and longer lasting method than the wood
- Unlike wood mast blocking, the engineered plastic mast blocking is tested to a vertical working load
- Composite lumber will not splinter and does not absorb most fluids
- 50 year warranty against splitting, rotting, absorption, termites and mold
- Standard color is blackv
