

Matting

*Provides comfort and grip to personnel,
while able to resist in demanding environments*

Product Overview

BLUFF
AN INTEGRATED WAREHOUSE SOLUTIONS BRAND

Composite Lumber

Manufactured and tested in compliance
ANSI Standard MH30.2

Innovative Products
Safety Standards

Features

- Thick, industrial grade mats which greatly reduce vibrations and quiet the clamoring of large and loud presses
- Standard tiles are designed for walking
- Hard tiles (model 1212-H) are designed for heavy traffic INCLUDING FORKLIFTS. Black is standard
- Solid Top Tiles (model S) are available for environments where a lot of small nuts, bolts and other hardware are used. The solid surface will help prevent items from slipping through the holes
- Eyewash station mats and other emergency area mats are available to help prevent slips and falls in pre-kitted boxes
- Eyewash station mats comes in 2'x2', 3'x3' and 4'x4'. Three sides of each mat have a highly visible 2.5" yellow ramp to help prevent tripping
- Anti-Fatigue Mats: Super Soft Texture (model SS) to prevent fatigue where people are standing for long periods of time
- Anti-Slip Mats: Standard mat (model 1212) has holes in the top to help drain liquids away from a walking surface
- Different textures are optimized for walking, standing or heavy forklift traffic
- Ergo matting is useful for a bit elevated tasks
 - Ergo matting is useful for a bit elevated tasks
 - Heavy gauge steel construction
 - Powder coat finish
 - Powder coat gray finish
 - Meets OSHA & ANSI

Optional Features

- Standard tiles are available in 15 colors (model 1212-C)
- In hard tiles, yellow is available as an option (model 1212-H-C)
- Eyewash station mats are available in green, orange and red
- Anti-Fatigue Mats: Can buy individual tiles or pre-assembled and stapled for a "mat-in-a-box"
- Anti-Slip Mats: Model 1212-G has an additional grit on the top surface to help prevent slipping on oil or even blood!
- Depending on your configuration, you can combine tile types and colors to indicate clearly the walkways, drive-ways and standing areas of your facility
